RE: Mitigation concerning
Crystal Geysers Draft EIR
in Mount Shasta CA

Dear Mr. Sawyer,

Thank you for considering
this request for mitigation
concerning the Draft EIR
for Crystal Geysers proposed
water bottling plant in Mount
Shasta, CA.

1) Waste Water Leached on
12 acres
I recommend Crystal Geyser

Company test the water leached into the 12 acres of leach fields on the proposed project site every August at depths 25', 75', 100' and 200' for water drinkability. The results of the water test are to be compared to the drinking water used by the City of Mount Shasta in 2016. These test are made available to all.

Reuse or Recycle Waste Water produced by Crystal Geysar Plant

I recommend the waste water be tested below the leach field on the proposed project site and if the quality is good, use the water for use in the plant to run various equipment or other suitable uses.

Thank You with Gratitude Emya Sapp
