Subject: Crystal Geysler DEIR

To Whom it May Concern,

Due to omissions of data in the DEIR, I am gravely concerned about the negative impacts on the surrounding environment.

- 1) Wastewater and chemical pollution has not been fully addressed. Chemicals such as maleates, fumarates, and BPA to name just a few that have been proven to cause many health issues. This is an important water shed.
- 2) CG is not honest with the public. For example, they refuse to tell us what will be dumped in the sewer. CG has also sent out false information to the voters of this county. How can they be trusted to be responsible stewards of our environment. This is an important water shed.
- 3) Local well water is threatened by commercial water extraction. This has already been the case when Dannon and Coca-Cola were operating here. This is an important water shed To bottle water is irresponsible. Health issues, environmental issues...this plant would be producing 660,000 plastic bottles per day!

Please, lets be responsible stewards and have sustainable practices.

Sincerely, Karina Pollard
Mount Shasta, Ca
