Subject: Response to Crystal Geyser Draft EIR

February 26, 2017
Mount Shasta, CA

Dear Mr. Ryan Sawyer, AICP

It is our understanding that Crystal Geyser Corp has submitted an incomplete EIR for the proposed project in Mount Shasta, CA. It is the hope of the citizens of this county that the corporation will comply completely with regards to their proposed project and with regards to their EIR.

It is in the interest of the citizens of Siskiyou County that a corporation being allowed into the county must not:

- 1) affect the quality of life on neighboring citizens in any adverse way: sight pollution, noise pollution, water levels dropping in nearby wells, water pollution, and air pollution
- 2) affect the quality of life of the physical environment in any adverse way: same criteria as above
- 3) respect the rights of private citizens, group of citizens, the city of Mt Shasta, and the environment on which the corporation's property exists and affects, including surrounding air, water, land, bedrock, roads, and the city sewer system.

We ask for a complete and honest EIR. We ask that the EIR address all three points in this letter. We hope that the Crystal Geyser Corporation will stand by the values of the citizens of Siskiyou County. Our values stand in this order:

- 1) Clean, Pristine Environment in City of Mt Shasta and surrounding 5-mile radius: air, water, land, bedrock, sewer, roads
- 2) Clean Environment in Siskiyou County
- 3) Jobs for 20 citizens

We ask that you consider a safer location for your corporation. Thank you for considering the requests and values of the citizens of Siskiyou County.

Sincerely,
Linda Vivas
Mt Shasta, CA
