Subject: I am all for the Crystal Geysers draft EIR

Greetings,

Just to be clear, I am completely opposed to Crystal Geysers. No private corporation, especially a foreign one, should have the right to sell off our natural resources and making a profit from it.. And now Shasta residents having to pay for our God given water???

With that said, I am all for the Crystal Geysers draft EIR. It with other limitations on growth.

Our natural resources For the People By the People.

We are a tourist town we need to maintain the resources that provide our town with revenue. Our natural resources, water at the top of the list.
