Attn: Ryan Sawyer AICP

Dear Ryan Sawyer,

Thank you for the opportunity to share my insights.

Perhaps my response will be very different from most, as people ask that many considerations be made to have a light impact on this small, precious tourist destination village at the mountain.

I came to Mount Shasta in 2002 from New York City, to have a more sustainable quality life. I came for the same reason that most have come.

Mount Shasta is a quiet, pristine, beautiful gateway surrounded with forests, mountains, lakes, and rivers. It is a place where international tourists come to find repose, retreat, regeneration, and refuge from a noisy and fast world of technology. And stress.

This environmental sanctuary is what brings both citizens and tourists here. It is an important point. It is the 'beginning point' in such a determination for a project to be built.

We must all use our great inner and innate wisdom in these determinations as we continue to create on this planet that we all call home.

Water is LIFE. Politicians forget, that without water THERE IS NO LIFE!

A corporation, such as Crystal Geysers, is the antithesis of what is called for in this special environment. In fact, privatizing water, is a backwards idea. We need to be researching 'open source' world for all our resources! We need to find new ways of being...that work for all. In a place like Costa Rica, the land, itself, has rights re: its resources that humans can't tamper with.

It is time that people, businesses and corporations everywhere begin to look at the necessity of realizing the higher purpose of such areas as Mount Shasta.

Money cannot be the bottom line for a world to work and thrive!

Waking up to the gifts of nature is the real goal!

In appreciation for your deep consideration of these insights!

Sincerely yours,

*Dorothea Joyce*
