Subject: Crystal Geysler

I am a property owner and business person directly across from the bottling plant. I have been at my address 425 Oakway Rd. for the last 16 years.

My pump went out and needed to be replaced in 2009. The light and the noise from the plant, not to mention the truck traffic is highly bothersome.

When I think about all the water that's already being taken out of Mt. Shasta I get an image of leeches sucking the life out of this mountain. Aside from the personal issues I presented .....what about the issue of possible sink holes? This feels way to dangerous for me. Anna Klimaszewski
