For Immediate Release:

Plane Crash Near Montague Airport

March 10, 2018

On March 10, 2018, at approximately 5:04PM, the Siskiyou County Sheriff's Office (SCSO) Dispatch received a report of a small plane crash in the area of Montague, California.

SCSO Deputies responded to the area and located a downed aircraft in a field north of the Montague Airport. Power lines knocked down during the crash caused a small vegetation fire that was quickly extinguished by local fire agencies. The three occupants of the plane sustained minor injuries and were released at the scene.

The National Transportation Safety Board (NTSB) and the Federal Aviation Administration (FAA) were notified of the incident and will continue the investigation.

Additional information will be released in the future.
