Protection Time/ Temp.	1 Food Temp.				<p style="text-align: center; font-weight: bold; margin-bottom: 10px;">COMPLAINT INSPECTION CONDUCTED THIS DATE</p> <p>This department received a complaint on 12/12/2023 that demolition and construction of the ware-washing area was occurring concurrently with the preparation of food. There was a concern that the insulation inside the walls and other products of the demolition were contaminating the rest of the facility.</p> <p>An inspection was conducted the evening of 12/12/2023 and discovered that the ware-washing sink was completely removed, and demolition of the walls behind the sink was indeed occurring. The facility was attempting to repair rotting wood, drywall, and insulation resulting from neglected maintenance which was noted as violations in previous inspection reports.</p> <p>As a result of the above incident, the facility was without a ware-washing sink for approximately 9 hours and potentially contaminated the kitchen during this period. Additionally, the facility utilized a hand washing sink to attempt to wash their dirty utensils. No utensils in the facility were properly washed, rinsed, sanitized, and air dried in accordance with the California Retail Food Code.</p> <p>In previous conversations, this department had instructed the management of this facility to ensure that no construction/demolition/remodeling can simultaneously be permitted due to the dangers associated with contamination of food prep surfaces and food. They were further instructed that the facility would be required to close when this type of work is performed. The activity discovered in this inspection falls within the scope of this work restriction, and the instructions provided were either misunderstood or ignored.</p> <p>The facility was ordered to close immediately as a result of the actions performed above.</p> <p>12/13/23: Facility is still closed due to the unexpected extent of the repairs required. The management has made a commitment to working with this department to avoid any confusion with instances that endanger the public and safety of the food prepared.</p> <p>Please contact this department for a reopening inspection when repairs are completed, the facility is properly cleaned, and all wares are washed, rinsed, and sanitized properly.</p>
